Material & Printing

LABORATORY

GAS CHROMTOGRAPH

Suitable for all kinds of food. Drug packaging plastic film solvent residue analysis test.
Purity analysis: suitable for for all kinds of packaging and printing solvent purity analysis
Water analysis: solvent water content analysis is suitable for packaging and printing industry.

HIGH TEMPERATURE REVERSE PRESSURE COOKER

Suitable for food packaging materials, adhesive, ink such high temperature resistant performance of cooking experiment.

FRICITION COEFFICIENT TESTER

Specialized in measuring friction coefficient of plastic film, sheet, paper, board, etc.

ELECTRONIC TENSILE TESTER

Suitable for tensile strength and the deformation rate, tensile rate, Heat sealing strength, tear resistance, peel test.

SEAL TESTER

It is suitable for food, pharmaceutical, medical equipment and other industries of packing bags seal test. sealing quality analysis for packaging.

Water Vapor & Oxygen Permeation Analyzer

To test the water vapor and oxygen transmission rate (WVTR/OTR) of packaging materials, such as plastic film, composite film, coextrusion film, aluminum-plated film, aluminum foil, infusion bag, pouch.
