## Who we are?

We are one of the chinese leading  
one-stop packaging solution provider,  
specialized in paper packaging with  
over 35 years of experience and 58  
niche areas of expertise.

We are recognized and renowned for  
our fast & flexible solution, outstanding  
customer service, and eco-friendly  
materials.

## What we do?

We take pride in our ability to design,  
create, and manufacture innovative  
packaging solutions for a wide variety  
of companies. Whether its new product  
launch, marketing tool, or a utility, we  
have the ability and the know-how to  
make it happen. We offer:

INDUSTRIAL PACKAGING  
PACKAGING SOLUTIONS  
CUSTOMIZED SERVICES

## Why you choose us?

At FPG every team member,  
right from the founders to the  
employees value quality.  
We are committed to:

QUALITY  
IN TIME DELIVERY  
AFTER SALES SUPPORT  
COST EFFECTIVENESS  
PRODUCT DEVELOPMENT  
VALUE ADDITIONS

Packaging Group

## How do we do?

FPG's confidence is technology. Because packaging technology used at FPG is the result of thorough research, the assessment from customers' requirement, the best in the world and always updated.

### Step 1. Recycling & Paper Mill

Paper mills provide raw paper, corrugated paper, coated paper, cardboard and etc., to produce packaging boxes. If other manufacturing processes required, foil stamping, embossing or others, the necessary materials would be provided.

### Step 2. Design & Sample

Defining customer's requirements is the most important mission to packaging designers, who collaborate with customers to collect information, design concept, favourite VI, color, text, images, ideas to initiate excited packaging. Providing dummy sample, mockup sample, die cut sample, pre-printing sample and pre-production sample is the guarantee of 100% qualified mass production.

### Step 3. Printing

Printing ink is printed on the packaging and a coating is applied which seals the ink onto the paperboard.

### Step 4. Surface Treatment

After printing, we will perform post-printing surface treatments, such as glossy lamination, matte lamination, glossy varnish, matte varnish, UV, spot UV, soft-touch lamination, anti-scratch lamination, gold and silver hot-stamping, debossing and embossing, to protect the printing or meet customer requirements.

### Step 5. Die Cutting & Sticky Box

Then paperboards are moved to the die cutting machine where the box shapes are cut out. The extra paperboard is removed and now you have your box in a flat form.

### Step 6. Quality Assurance & Shipping

Quality is the ultimate goal and founding philosophy at FPG. Every member of the FPG team is trained, educated and enthused with the spirit of quality consciousness since the day she/he joins.
